

Interview Date: May 11, 2011, 10:00 AM - Noon. EDT

Place: Hardys residence

Interviewees: Dean and Mary Hardy

Interviewers: Larry and Priscilla Massie

Attendees: Larry and Priscilla Massie

Topic: John Fetzer's Spiritual Search

Draft: May 27, 2011

Edit: PB 2018-07-12

Larry Well, tell me a little bit about yourself before you met John Fetzer, if you wouldn't mind?

Dean Well, I moved up here in Michigan. Got a job at a construction company and married Mary Mahan; you know, so we've been married for just about fifty years now.

Larry Her maiden name was Mahan?

Dean Yeah.

Larry The doctor's daughter?

Dean Yeah.

Larry Oh, really?

Dean Yeah, he should be around right now working on me.

Larry Yeah, he was a good doctor, wasn't he?

Dean Yes, he was.

Larry Yeah, he was—well, he just had a way about him, and if you didn't have enough money, he'd say, "I'll go along with you," you know?

Dean Yeah, he'd say, "It's hell to get home." I used to laugh at him, but not anymore.

Larry No, well we've all got to cross that bridge someday, don't we?

Dean Yeah, I guess.

Larry So how long have you lived out here?

Dean Fifty years.

Larry Fifty years?

Dean Well, July 1st.

Larry July 1. I bet there weren't as many cottages when you came out, were there?

Dean Well, there aren't as many now as there was then.

Larry Oh, really?

Dean Yeah, the guys over here, the two next ones down here, they tore the house down between them, so they could add a bit more onto, you know.

Larry Yeah, people are tearing down these old cottages and building big ones, aren't they?

Dean Yeah.

Larry Yeah, so how did you get interested in pyramids?

Dean Well, I always kind of had an interest in them, for a long time, but I would just—you know.

Larry Yeah.

Dean Interest.

Larry Did you study books about them?

Dean No, just what I read about—I read. Didn't know anything about the formulas or anything like that. And one day we were over at—what is it on the east towards Richland over there?

Larry Oh, Gull Lake?

Dean No, no —because I know it was a Catholic run school.

Larry Oh, Nazareth?

Dean Yeah, Nazareth.

Larry Okay.

Dean We'd meet in the basement and talk and everything. And one night I was over there—every Sunday night, you know, we'd sit around.

Larry Was that with Sister Liz?

Dean Well, which Liz?

Larry Liz Reese.

Priscilla Sister Elizabeth Reese.

Dean It could have been. It's been a long time ago.

Larry So you gathered—

Dean We'd discuss things.

Larry Was John Fetzer involved in that?

Dean Not at that time.

Larry Okay.

Priscilla But Jim Keating was?

Dean Yeah, Jim Keating was. As a matter of fact, he invited me to come over and talk about pyramids. I was set up here one night—as a matter of fact, the first meeting I was there. I ended my talk with having to build one.

Larry Oh, that's what made you decide to build—

Dean Just all of a sudden—I'm going to build one. I'm driving home and I tell Mary, "Honey, how the hell do you build a pyramid?" And the more I got interested in it and everything. And then they said that Jim Keating knew a group out in Canada that—

Larry Swierenga and Killick.

Dean Ken Killick, yeah, he's the one that we went up to meet. I was talking to him on the phone one day and he says—he's very clairvoyant and psychic and everything—and I was talking to him on the phone one day, and I said, "Ken, I've got a notion to build a pyramid, but it's kind of complex." And he said, "Well, what did you have in mind?" I said, "Well, I was going to have wires to ground, and wires strung here and there and everything. It's just a thought, you know?" And he said, "Do you have the plans right there?" I said, "Yeah." And so he said, "Lay them on the Formica right over there by the phone there." And he looked at them and he said—almost like he's got a camera in his head, you know—he said—

Larry Oh, he was here?

Priscilla No, he was on the phone.

Dean He was in Canada. I was talking to him from Ontario.

Larry Okay.

Dean He was in his home. And he said, “Well, what do you got in mind?” And I said, “We’re supposed to build one for our son.” John at the time was only—I think he was somewhere around three or four years old, you know; and Mary could verify that better than I could. But anyway, he said, “Well,” he said, “Do you love your son?” Because I was telling him about putting layers—layers of different materials on there and everything. And I said, “Yes.”

And he said, “Well, do you know what you have there?” I said, “Nope.” He said, “You have two gigantic antennae, which would start collecting energy, and once you build it you couldn’t get near it to tear it down, because whoever walks near it”—it’s like a big capacitor is what I was building, you know? And he said, “You couldn’t get near it to tear it down, and probably anybody walking by could get an electric shock. It might even kill them, you know?”

Larry Oh, really?

Dean “Well...” I said, “I guess it’s not a very good idea.” And he said, “Can you come up to my house one of these days?” So we said, “How about this coming weekend?” So we drove up to Ottawa, and we sat in his basement and designed this pyramid that we’ve got there.

Larry Do you remember what year that was?

Dean Well—

Larry 1970’s?

Dean Yeah, I was trying to think. About 1975, I think.

Priscilla So that was in Ken Killick’s basement, huh?

Dean Yeah.

Priscilla Wow.

Dean He designed it, and we started building it out here. We were in the process of building it when we had a phone call; he said, “I don’t know who’s going to

bring him out,” but he said, “There is a gentleman from Kalamazoo who would like to talk to you.” That was Fetzer.

Larry John Fetzer.

Dean John Fetzer, yeah.

Larry So you hadn’t even constructed it yet.

Dean We were in the process of building it, yeah. He came out, and then he came out a few times after that, and it was kind of interesting. When we finally got it done, he came out ,and he came up to me and he said, fingers he had out, he shook hands like this. He said, “You’re one of the very first ones who’s ever come out, shook my hand like this, and didn’t come out like this.” Like a handout, see?

Larry Oh.

Dean So it was just—

Priscilla Everybody was always asking for a handout.

Dean Wanted money.

Larry Oh, he thought you were going to?

Priscilla No, no, he said he was—

Dean He said, “You shook my hand like this, not like this.”

Larry Oh, I see. I get it, yeah.

Priscilla What happened at the first visit when he came?

Dean Well, the first one, he was interested in it. We didn’t have it complete yet or anything. But after that he came out two or three times. Felt real good in it.

Larry Oh, he got inside it?

Dean Oh, yeah.

Larry Was Rhea with him, his wife?

Dean I don’t think so. I don’t remember. I can’t remember.

Priscilla He just came out alone?

Dean No, I think somebody brought him. Might even have been Jim Keating. I don't know.

Larry Right, he was down here at that time.

Dean Yeah. So I spent some time in his office talking to him, you know?

Larry Oh, did you ever go to those meetings that he had regularly?

Dean No, I didn't.

Larry There was a weekly meeting.

Dean No, we never even got to it. I know he was discussing—there were three books.

Larry A Course in Miracles?

Dean Yeah, a Course in Miracles. A guy came down and gave us a whole set of them one time. Not—Fetzer didn't give it to us.

Larry Somebody else did.

Dean Somebody else said, If you read them, I'll give them to you.

Larry So that's your relationship with John.

Dean Well, it wasn't a big relationship. It was—I felt very comfortable around him, you know? The things that we would discuss.

Larry Did he ever talk about pyramids in relationship to Masonry?

Dean Oh, yes.

Larry He did?

Dean A little bit. He didn't a lot but, I mean, he talked about it. And then they got around to—Ken Killick says—he even introduced me to John Fetzer's—Cheops. Not the—

Larry Ramses?

Dean No, it wasn't one of those guys.

Larry No?

Dean But anyway, he said I was like a project engineer.

Larry Oh, that you were back there as a project engineer?

Dean And then all of a sudden, started sparking things in me.

Larry Oh, you were remembering?

Dean Yeah.

Larry Were you? And so you were in a past life with John?

Dean I think so, yes.

Larry He believed that he reappeared or had been eight different people.

Dean I think it was more than that.

Larry More than that.

Dean I think, so over a period of time, you know? I kind of happen to remember—

Larry Oh, it was coming—

Dean Our paths crossed. Not a real close relationship, but somebody would remember something.

Larry Yeah, did you meditate to do that ,or did it just come to you?

Dean Well, actually Ken Killick is the one who kind of got me onto it. After he did that, I got to where I started meditating and doing things like that.

Larry Yeah, well eventually John and Ken had a falling out.

Dean Yeah, that was because of Lloyd Swierenga.

Larry It was?

Priscilla What happened there?

Dean Well, he tried to run things.

Larry Yeah, he was the director out there for about a year.

Dean Yeah.

Larry And then he got let go.

Dean The only thing I can think of, of course—Lloyd Swierenga tried to run us.

Larry Oh, did he? Told you what to do?

Dean And as soon as he got canned—I was a very good friend of his, and he was trying to get me to will the pyramid out here to them. To the Canadian group.

Priscilla Les Initiates.

Dean Les Initiates, yeah.

Larry Oh he's trying that, huh? So he did have his hand like this?

Dean I think so. I really do, and he was always kind of a conniver.

Larry Yeah.

Dean But I mean that's his path.

Larry Yeah, well that's interesting.

Dean Lloyd and I got along good, you know, but I just didn't—because when—Fetzer's such a nice guy.

Larry Yeah.

Dean He was just a peach of a guy. He never talked down to you.

Larry Right.

Dean He was interested.

Larry Yes, he was a very humble person.

Dean Yes, he was. When I talked, I never felt like I was talking up to him or down to him. Just like the old saying, "Don't walk in front of me I may not follow, and don't walk behind me because I may not lead, but walk beside me as my friend."

Larry Yeah.

Priscilla Right, man to man.

Dean Yeah, that's the way I always felt around Fetzer.

Larry Did you ever talk about reincarnation with him?

Dean Oh, yes.

Priscilla Do you remember any of the conversations or things like that?

Dean Oh, that's been long ago—

Larry Yeah, it has been.

Priscilla So long ago.

Dean It was really kind of like a casual relationship. I mean, although we talked, discussed lots of things, still it was more like you and I get together and discuss things, you know?

Larry Sure. So sometimes you'd go up to his office and discuss things?

Dean Yeah, I was there about two or three times.

Larry And Mary with you?

Dean No.

Larry No, just you?

Dean Well, I don't think so, no. It was when Kenneth was there. I'd go up to see Kenneth, too.

Larry Sure. Well, you've got an obelisk out there too. What's the significance of that?

Dean Well, that's another part of the antenna system, an obelisk was like an antenna between the Earth and the—

Larry Another layer up there?

Dean Well, sure. As a matter of fact, we had a group. There were seven of them just exactly like this, getting around the country exactly like that one, and we used to go out and set up by it at night or something. Pick a time and take something with us and hold it up see if anybody could identify it.

Larry Oh, and could they?

Dean Well, I could identify orange or red or green or something like that, but—

Larry Oh, the color. You saw the color?

Dean Yeah.

Larry Now is that like into the astral plane?

Dean I think so, yeah.

Larry Yeah, that's interesting. Now, somebody told me that there was a UFO sighted in conjunction with your pyramid.

Dean Oh, yeah. Used to be I'd dowse over the land out here. It would have left an imprint in your home.

Larry Oh, did it?

Dean We'd walk out and dowse where it was, and then we'd start dowsing the whole area, you know? There was a pattern around that obelisk out there that spirals into it.

Larry Not too big though, huh?

Dean Well, it covers most of the neighborhood.

Larry Oh, really?

Dean But we probably—because we could go down and some of these people—before they've changed hands of the property, we could see them, oh, maybe down past the end of the road.

Larry Oh, okay. Did John talk about UFOs with you?

Dean He was kind of feeling us out.

Larry Well, he—I'm pretty sure that he believed in them.

Dean Well, I think so.

Larry You know, did he ever talk about Edgar Mitchell?

Dean Yeah.

Larry You know about him?

Dean Yeah.

Larry Noetics?

Dean Yeah. As a matter of fact, we went over to—was that Kalamazoo College over there?

Larry Yeah, when you heard him speak?

Dean Speak, and there was a little gal sitting kind of in front of me off to one side a little bit. She said, “Mr. Mitchell?” “As a matter of fact that’s right.” She said, “Mr. Mitchell, do you believe in UFOs?” And he looked at her and said, “Do you believe in God?” You know, he’d ask questions like that. He stopped talking. He said, “Young lady, my God is bigger than your God.” Talking, he might go out in space.

Priscilla Oh, yeah.

Larry Coming back he had this epiphany.

Dean Yeah.

Larry And so—

Priscilla Changed his life.

Dean Oh yeah, everybody who’s gone out there has changed.

Larry He was quite close with John.

Dean Yeah.

Larry So yeah.

Dean I always felt, sitting out here at night, you know, and looking at the stars and everything, he said, “How can man be so damn conceited? He thinks he’s the only one in this vast universe that seems to go on forever.”

Larry Yeah.

Dean Every time they get a bigger telescope, it seems to go farther and—

Larry Well, it’s like people of a certain religion that think they’re the only ones that know—in a way.

Dean Yeah, and you get far enough away from the Earth, the Earth just disappears. You don’t see it anymore. You’re so far away, you know?

Larry Sure.

Dean That's why I like these guys that come back, and they look back on Earth, and they don't see fences, they don't see boundary lines or countries or anything like that.

Larry Just water and land.

Dean And it makes a difference in the way—well, even when I used to fly. You know, I'd get up high enough, I wouldn't see the fences and all that; but I wouldn't know when I went across the line to Indiana or Illinois or anything like that, because it's just—

Larry That's crazy, yeah. Well, did John ever talk about crystals?

Dean Oh yeah, yeah.

Larry He did?

Dean Yep, he was interested in crystals.

Larry Right, and he believed they had power. How about—did he ever pull out his pendulum?

Dean I'm going to tell you—he almost had me start using a pendulum.

Larry Yeah?

Dean Yeah.

Larry Well, he could do things with it.

Dean Yeah.

Larry Did he bring it out and show you how it worked, ask it questions?

Dean Well he'd ask it questions and I think. I thought, If he can do it, I can do it. And then I got to dowsing, really dowsing, you know?

Larry For water?

Dean Anything.

Larry Could you do it?

Dean Yeah.

Larry John could do it quite well.

Dean I went to a meeting over at Schoolcraft. There were some people there, and they just spent over \$2 million dollars on a seismograph that could tell if there was anything in the ground, you know? I said, "Well, Lake Michigan is sitting on a bed of salt, huge bed of salt there, and then there's oil below that, 6500 feet down, but it's there."

Larry Yeah.

Dean He said, "How'd you find that out?" And I said—

Larry Oh, with a pendulum?

Dean Dowsing rod. He said, "How'd you get that?" I said, "I just dowsed for it." "You mean to tell me we spent \$2 million building this machine we didn't need to?"

Larry Did he ever tell you about finding water out in Arizona?

Dean Yeah.

Larry On a—

Priscilla Dowsing out there.

Larry Hi, Mary.

Mary Nice to meet you.

Larry You're Dr. Mahan's daughter.

Mary Yeah.

Larry Oh, he was a wonderful man.

Mary Did he tell you we built pyramids?

Larry Yes.

Priscilla Oh, yeah.

Larry We knew that.

Mary Well, the reason why is because—

Larry Oh, please sit down, Mary.

Mary I'm going to get you my book.

Larry Oh, okay.

Mary Have you seen my book?

Larry You know, I think I did years back, but I'd like to see it again.

Mary I'll give you a copy.

Larry Oh, great. I brought one of mine for you.

Mary Kenneth Killick was a 33rd degree Mason.

Larry Okay.

Mary And that's Kenneth. And so was John.

Larry Right.

Mary And—

Larry Is this your book? Wow, that's a beauty.

Mary There is a picture of John's Ark of the Covenant.

Larry He had a model of that, you were telling me?

Mary That is a copy of a model that was in his office.

Larry How big was it?

Mary How big was it, Dean?

Dean Pretty good size, but it wasn't huge.

Mary Wasn't huge. It was probably—stood about like this, about that big.

Larry Did he ever open it up or anything?

Mary No, Kenneth walked over and said, "Mary, do you recognize what that is?" And I said no, and he said, "It's a replica of the Ark of the Covenant." He asked me at that point never to reveal that he had it in his office.

Larry Because I'd never heard that before, that he had it.

Priscilla So did he leave the Ark out in his office all the time, or he brought it?

Mary It was just there.

Priscilla On his desk or on the floor?

Mary Were you ever in his office?

Larry I have been, yeah.

Mary You know his secretary's desk was here, and his desk was here, and then he had—

Larry Display cases next to his desk.

Mary The desk with the Tigers stuff; and then across from the display cases he had some things, and that was the centerpiece across the other way.

Larry Oh, okay.

Mary Because Kenneth walked over and said, "I want to see if Mary knows what this is."

Larry See now, I was first in his office 1980, and I don't remember seeing anything like that. This was before 1980 that you were up there.

Mary We were in his office in '75.

Larry 1975, is that when he first came out here, too?

Mary Yes.

Larry Okay.

Mary You see one 33-degree Mason talked to another 33rd degree Mason and our job—I'm going to read this to you. I'm not a very good reader but this will give you an idea. We were contacted by the elders of the planet to construct the pyramid. Now Sawyer Air Force Base is an ELF station. Are you aware of what Sawyer Air Force Base was?

Larry ELF?

Mary Extremely Low Frequency.

Larry No, I didn't know that. Yeah, I know where it is.

Mary Okay. What they did is they wound wires around mother Earth's grid so they could pulse the Earth, so they could communicate with Seafarer. That's why they sold it; so a submarine didn't have to surface. They could send a Morse code through the Earth. Now the antenna system for that is the CN tower in Toronto and the Seattle space needle in Washington. And the elders of the planet were concerned that this would do—

Dean Could be.

Mary Could do severe damage to—

Dean Human race.

Mary To the flowing of the waters in the Gulf Stream.

Dean And the human race.

Mary And the human race.

Dean Through mind control.

Larry Who were the elders of the planet?

Mary You know the elders of the planet - Brother John, who was the author of Revelations, was the one that I've always known, and he carries the name of Kuthumi.

Larry Is this like the White Brotherhood?

Mary Yes.

Larry It is? The same thing?

Mary Well, yeah, and 33 degree Masons are aware of that. That is some of their secret knowledge.

Larry Right.

Mary John wanted to meet Kenneth, and so probably Kenneth told him about the project. I wasn't even aware of it at that time. We just were told that if we did not build a pyramid for my then three-year-old son, when we got picked up in 1968, that he would not stay our son. He had a mission to do and for that mission he had to have a pyramid.

Larry Now, when you got picked up, what do you mean by that?

Mary Didn't he tell you that we lost four hours of time?

Larry No, no. This was a UFO?

Mary No, I don't think it was.

Dean I think it was because we were coming home from my home town in Indiana, and we start taking Cross Country to come home, you know? Because ordinarily we come to Marshall, and Marshall across. At night we started taking Cross Country. The boys, they were very small. How old was John then?

Mary John was three and Mark was five.

Dean Okay, that's right, three and five.

Priscilla What year was that?

Mary 1968. John was born in '65 and Mark was born in '63.

Dean So anyway, what happened was the boys said, "We've got to go potty." I said, "Can't you wait until we get to drive-in at Three Rivers?"

Mary It was probably School—which one is just south—

Dean Oh yeah. Schoolcraft, yeah.

Mary Just south of Kalamazoo.

Larry Yeah, that would be Schoolcraft.

Mary We were going to stop at the hotdog place. We'd stop some place, and the boys were hungry; it was just about seven o'clock at night, because we had stopped at some friends, and they were getting set up to eat and the boys were hungry. The guy told us a shortcut through the back, and he said there's a good hotdog stand and Dairy Queen in Schoolcraft.

Larry Yeah.

Mary So we were headed there, and it was about seven o'clock at night when we got to Schoolcraft, to the hotdog stand. They closed at ten o'clock and they'd been closed for 45 minutes.

Dean Well, just a minute. We walked out in the field, the three boys and I. Mary stayed in the car.

Mary Two boys.

Dean There were two boys, I mean. Well, I'm a boy. Anyway we went out and—

Larry So you went out in this field?

Dean We went out in this corn field, and all of a sudden there was a horrendous roar, and the cornstalks just circle around us, everything else. Then all of a sudden we're getting back into the car. It was just that quick.

Larry And the time—you had lost—

Dean That time was—when we got to Schoolcraft it was—

Mary It was now 10:45 because the Dairy Queen had been closed since ten o'clock.

Larry But Mary, you were in the car when this happened. What did it seem like to you?

Mary I was sitting there, and I didn't remember anything, and I was looking at the moon. All of a sudden when I woke up and they started getting in the car, the moon had moved from here over to there.

Dean We went in there and saw this filling station, right there across the street and they were closing up. I looked at the gas gauge and I said, "I've got to get gas," and I ran across there and I said, "Boy, you're closed up kind of early aren't you?" He said, "We always close up at 10:30 at night."

Mary 11 o'clock.

Dean Was it 11 o'clock? Then I realized from that—wasn't much over a mile and a half to get to town, you know, that we'd lost all that time.

Larry Wow.

Mary It had gone from almost seven, because it was just getting dark in the first of October, to when we pulled into the filling station and it was almost 11 o'clock. We had gone down to the Dairy Queen first, and they had been closed, and that's why I said we lost 45 minutes of time.

Dean We couldn't comprehend in our mind that we'd lost that much time.

Mary Then I said to Dean, "It looks like that filling station is closing." So we went back, and it was almost 11 o'clock by that time.

Larry Wow! So did you realize at the time that something, a phenomenon had happened to you?

Mary No, not really.

Dean Yeah, actually I told Mary when we were driving home, I said, “Mary, something’s in the car with us.”

Mary Yes, something was in the car with us.

Dean Something was in the car with us.

Larry You felt an entity?

Dean Yeah.

Mary And then every Sunday night—

Dean From about that time of night.

Mary That back door wouldn’t lock, and we had beings move through the house.

Larry Really, and you could sense them?

Mary Well, you know, that time the TV had come on and had the batteries running all the time, so when they were in the living room, there was always a big spot on the TV like there was an electro-magnetic charge in the room. The TV wasn’t on, but there was an electro-magnetic charge.

Larry You think these were beings from another planet?

Mary I think they were The Elders of the planet.

Larry Oh, I see.

Dean But anyway, one time we were driving home and Mary said, “I think they’re in the car with us again.” I said, “Okay, grab the switch,” and I was trying to say, “If you’re here, show us a sign”—and the lights went out.

Larry Your car lights went out? The headlights?

Dean Yeah, I didn’t touch it. Or Mary.

Larry Yeah, wow.

Dean Then the door flew open.

Mary The back door flew open.

Larry Wow, that's scary.

Dean It was, but the lights came back on, you know.

Larry But you weren't scared by these?

Dean Not really. At the time we had absolutely no knowledge about anything like this. Back then, there used to be a big fireplace at the end of the room there, and we had a Heatilator for the fireplace; in that back corner over there was an Indian sitting there all the time, and he'd pull stuff on us every once in a while.

Larry You'd see him?

Dean Well, you could turn on a red light or something and you could see some being there. I never saw his features, but I knew—like you sitting here but—

Larry Yeah, well people commonly felt Indians were a medium to the spirit world.

Dean Yeah, they are.

Mary The thing that you need to understand about Fetzer is he was a 33 degree Mason, and when Kenneth heard what our mission was and the two of them got together, they decided to work a little bit together on this. Now, you know that 33 degree Masons have secret knowledge, and that's probably why he had the Ark of the Covenant in his office, because he was attuned to that frequency.

Larry And the pyramids figure into Masonry too, don't they?

Dean Oh, sure.

Mary I'm going to read the purpose of the Temple of Sakkara.

Larry Okay.

Mary New Sakkara is a healing temple, as was the predecessor, Sakkara in Egypt 5,000 years ago. New Sakkara teaches the wisdom of the divine change through alchemy. We work with the divas and the fairies of earth, air, water, and fire. Alchemy is a divine wisdom of change. Change the energy, you change the manifestation of the mass. The Temple of Sakkara has been given an antenna system to change the frequency within the grid, to allow mankind to achieve advancements into a higher plane. New Sakkara now incorporates three properties: the Temple of Sakkara, Mary and Dean Hardy's, the second pyramid at John Hardy's and Ascension Hall at Steve Hardy's.

Peter Champeaux has put together a system of maps that coordinates these three properties. It is important that these three properties are linked to create a

stronger, more balanced antenna system. Sakkara was created to heal the mistakes as the destructive problems that have been created by mankind's assault on the environment. In 1975, the first pyramid built was built, to counter-act the ELF station that was created at Sawyer Air Force Base. The antenna system at Sawyer incorporated the CN tower in Canada and the space needle in Seattle, Washington.

The temple was activated before the system went online. The purpose of the pyramid was to balance out the abnormalities that would have been created by the ELF station at Sawyer Air Force Base. The Elders of the Planet created the Temple of Sakkara to prevent the planet from dying through man's stupidity. You see, they would have interfered with the natural flow of the Gulf Stream and raised the temperature in it so that would have killed the planet. And this antenna system—see—

Larry We're doing a little slower another way though, aren't we?

Mary Yeah, we are.

Dean Like Kenneth used to say, it's up to mankind. If they want to, they can do it, and they can make it transfer peacefully with their attitudes towards people and everything else. But if they keep this greed and all this stuff in there, it isn't going to be green.

Mary So the pyramids are nothing more than antennas.

Larry Okay.

Mary And what was designed by Kenneth was an antenna system, so that my son, John, who, at the time we built it, was ten years old, and that was 1975. By that time, before Sawyer went online, Hilarion, who is an Assyrian space commander, and John could protect the frequencies within the grid to prevent the heating up of the Gulf Stream.

Larry So your son, John, was given a mission, too, then?

Mary Well, that's why we were told that if we did not build the pyramid before he was ten years old, that he would not remain our son.

Larry Oh, really? Which means he would die?

Mary Which means he just wouldn't stay with us. I think John came out in several bodies and to several families and to people that had acupuncture points on the planet that could—you see, my father was also in another lifetime. Do you believe in past lives?

Larry I'm an agnostic about it.

Mary You don't—

Larry I don't disbelieve, and I don't believe.

Mary Well, my father probably was a very great Indian chief.

Larry I know he was a great doctor.

Mary He was a great Indian chief called Standing Bear.

Larry Did he believe that?

Dean He'd say, "Mary, if you keep talking about this, they're going to come in and get you into a straightjacket."

Mary One time I walked into his office and I said, "We have to build a pyramid."

Larry And you're talking about your dad?

Mary Yeah.

Larry Okay.

Mary I walked into his office. I said, "We have to build a pyramid." And he said to me, "Mary, you know what I can do," because my father could look at you and change your electro-magnetic field. He didn't have to give you pills. In fact, half the pills he gave out were sugar pills.

Larry I wouldn't be surprised.

Mary That's why the AMA kicked him out.

Larry They did?

Mary They didn't kick him out. He couldn't get—

Dean Insurance.

Mary He couldn't get insurance.

Larry Would he heal with his hands?

Mary No, he healed by looking at you.

Larry Just looking.

Mary He was an alchemist. He could change the electromagnetic field in your body.

Dean I'd go and sit in his office and talk some Sunday mornings. People would come in and they'd say, "We can't understand it, but all we have to do is come in and talk with him and walk out and we feel better." And I'd watch him. While he talked to them, he is—

Larry Looking up and down.

Dean Constantly looking up and down their aura.

Larry Oh, did your Dad ever talk to John Fetzer about this?

Mary I don't think so.

Larry Okay.

Mary I don't think so. My dad was a 32nd degree Mason; but John was a 33rd degree Mason, and so was Kenneth Killick.

Larry That was the highest you can get.

Mary Yeah, and they have special wisdom, so I imagine I'm not aware of that. But I imagine when John Fetzer heard about our mission, that John wanted to be part of it.

Larry And do you think he found out through Ken Killick?

Mary Well, I think Ken probably explained it to him. I think that was a test for me, when they walked me over to show me the Ark of the Covenant, to see how much I had gleaned from all of this experience. I think that's why I was asked the question.

Priscilla So was it Ken that brought John out here then to your place?

Dean No, actually I think it was Jim Keating the first time.

Mary Yeah, it might have been through Jim Keating, that Jim might have introduced Ken. I have no idea how Ken and Fetzer got together, but they were two 33 degree Masons. On that 33 degree Mason level I wouldn't be surprised if the antenna system wasn't discussed.

Larry Sure.

Mary I have no awareness of that, but I know John was very, very interested.

Larry Mary, did you go to any of those meetings at Nazareth?

Dean Oh, yeah.

Mary The Sunday meetings?

Larry No.

Mary The Sunday meetings in the basement.

Larry That Jim Keating was involved in.

Mary Yeah.

Larry Was there a Catholic nun by the name of Sister Liz there?

Mary Sister Alice.

Larry Oh, that one I don't know.

Mary I don't know either.

Dean I remember they had just started wearing civilian clothes when they'd go out, and I didn't know she was a Sister, a nun, you know? She sat down beside me, and was talking about how they got holy water, they'd bless it and everything. I was like, "Yes." Then I punched her and said, "I always thought they got holy water by putting it on a stove and boiling the hell out of it," and she jumped up and laughed. She had to go all over the college and stuff.

Larry That's pretty good. Do you remember anybody else that was there, Mary?

Mary Oh God, you're talking about '68.

Larry Oh, that early was it? Oh, okay. I don't think John Fetzer got involved that early.

Dean I don't think so. He wasn't around then; but anyway, Joe Bedache was there.

Mary Joe Bedache.

Priscilla He was from Plainwell. He was with Les Initiates.

Larry Oh.

- Mary Okay, let me finish this. Now the two properties have been added because of the disaster in the Gulf. The disaster has slowed down the spinning of the vortex in the Gulf of Mexico. Because of this it will eventually cause more severe abnormalities in the weather patterns and destruction to the planet.
- Dean Yeah, like an F-5 tornado, you know?
- Mary That's exactly it. While on Steve's property in 2009, two Native American spirits came to myself, Sherry, and Dixie. They identified themselves as Chief Tecumseh and his brother the prophet. The history tells the story of how to heal the Gulf and the New Andreas Fault. It seems that Tecumseh wished to unite the tribes of the Great Lakes with the southern tribes, to force the white man off the land. He gave the tribes a bundle of sticks which would be burned at certain times. At the end of their burning, a prophecy would appear.

After the sticks were burned, the prophecy turned out to be a violent earthquake at the New Andreas Fault. Tecumseh at the time of the meetings with myself, Sherry, and Dixie declared Steve's land as a very important vortex point in healing the Gulf and preventing the destruction that occurred in his prophecy. From the higher dimensions he has returned to help heal the man-made mess that will eventually weaken the area and may even cause the Great Lakes to flow down the Mississippi. This would be a great destructive force to the planet. That is why the three properties have been united.

Every time we go out of balance, we make a correction to return to balance. Our economy is going through a rebalancing so the Earth's grid—rebalancing; and so is the Earth's grid. To keep up with the divine design, the Temple of Sakkara calls on each speaker and participant to remember who you are, find your divinity, and accept the changes as blessings. Mary Hardy has taught the Holy Grail vortex and the alchemy of change for 30 years. It is now time that we as a group learn to use the antenna system of new Sakkara to bring about the positive charge in the world.

In the months of May 2009 our news media spread fear throughout the world with their focus with swine flu. They tried to generate this fear through the Earth's grid. With cancer and a variety of other lethal diseases in the world where HARP, ELF, CERN, chem trails, genetically modified food, and thousands of other pollutants interfere with every aspect of our lives and every aspect of the integrity of mother Earth. Change and healing are necessary. What was done in 2009 was to ask the fairies and divas, the Templars, the shamans, to create crop circles in England to counteract the frequency in the grid.

That was designed to create harmony. In 2009 over 79 crop circles were created in England's Stonehenge. The Templars and John—if he was a 33—they were the masters of the grid. They actually knew how to run the grid. So I suppose that John was very interested in our project. Two-thirds of the crop circles were

created to change the energy from something that would harm mankind into something that would benefit mankind. As a result, those that were broadcasting through the news media about creating a pandemic have not been able to achieve the proper frequency within the grid to create the world wide pandemic of swine flu and other major diseases. And I wouldn't be surprised if John is in the upper—is in part with Kenneth and other 33 degree Masons—are part of who's working with us.

Larry Still?

Mary Still, yeah. In order to bring about the necessary focus, Mary Hardy, the sisterhood, the brotherhood, and all the following spirits working with us ask all the spirits and healing practitioners to add the healing of the Earth's energy to your agenda, if you are not already there. This year we plan on having a sacred fire, a fire walk. It is necessary that people honor the sacredness of the land. Our opening and closing ceremonies will be dedicated to spreading the sacred consciousness of the fairies and divas, Templars, native shamans, and other dimensionals throughout the grid by learning the correct way to bless the land through the Holy Grail vortex, and to keep it sacred by the ceremonies of the sacred fire walk and opening and closing programs. Here's our schedule. You can have that.

Larry Have you had that fire walk before?

Mary Yeah.

Larry For several years?

Mary Yeah, have you heard about it?

Larry I've heard about it through a participant.

Mary Well, what we did is—

Larry He's an artist from Kalamazoo. Do you remember?

Mary I don't know what's—

Larry Oh, it's right on the tip of my tongue.

Mary There's 200 people out here.

Larry Oh, is it that many?

Mary Yeah.

Dean More. We've had as many as 335.

Mary I don't know 95 percent of them.

Larry Oh, they just show up.

Mary But you see, we stopped it one year because we had a bunch of boats out there watching, and the neighbors down here had a big beer party to hoot and holler and to watch it, and that's not our purpose.

Priscilla So you'll have it here this year?

Mary Yeah.

Larry Did you have it back when John was alive, John Fetzer?

Mary Oh no, no, no. John died—

Larry '91.

Mary 1991. You see what happened is through misunderstandings; you have to understand how the grid works. We had two millionaires that were backing us. John was one of them and a man named—

Larry Did John fund you?

Mary No.

Larry No, he just gave you support.

Mary He gave us support. But what happened is obelisks are upshoots and downshoots, and in the process of putting the obelisk—the man who designed this obelisk—

Larry This one out here?

Mary Yeah, he had six of them. Five of them were to control a line. You'd have to go into—remember the snowstorms of '75, '76, '77?

Larry Yeah.

Mary We put an obelisk out in Sedona. Okay, now you see what happened and it's in the book: Russia tried to use their planes, and they created huge antennas to control the weather. When they shut those antennas down, they didn't dissipate, and they collided in the Indian Ocean and created a tsunami, but can you imagine? You know what a cyclotron is? It's like a big vertical vortex along the land. You take from Point Barrow in Alaska all the way down to the Falkland

Islands. There was that huge vortex block, and in there Kenneth Killick writes about (and I do think John was interested in all of this) that vortex block, because he was behind us in putting in the obelisks, and he gave Kenneth a car, his wife's car. He tried to help Kenneth.

But you see what happened is: our government, using Sawyer Air Force Base, created a cyclotron that went all the way down from Sawyer down through Florida, and that's what destroyed the orange blossoms, because the weather followed that. Well, the cyclotron here —what they wanted to do was move those two cyclotrons together to annihilate them. We had to build a second pyramid, put an obelisk out in Sedona and that created a vortex in 1980. That created a vortex that dissolved that line.

Then now you had the line that Sawyer Air Force created, and so we put up five obelisks to maintain that line. Then we put an obelisk over in Pennsylvania and we started taking it down; the dumb bunny who put this obelisk up took one down and put a downshoot obelisk on an upshoot which really took the obelisks out. For the first time in recorded history the jet stream went across the United States like this, and you can look that up, it was in 1993.

Priscilla Now when you say we, who are you—what are you—talking about?

Mary Oh, a group of Les Initiates that were doing this.

Priscilla So it's all Les Initiates?

Mary Yeah.

Priscilla Okay.

Larry Are you still an Initiate?

Mary No, the Initiates were dissolved. Lloyd Swierenga had a lot to do with that. It was his ego that destroyed it—kept us away from John.

Larry Oh, he did?

Mary And he took over.

Larry He kept you away from John?

Dean Yep.

Larry Did he? He wanted to run everything.

Mary Oh, yeah. He got to be designer of the Fetzer. I mean, that is the way I feel; and he discredited Kenneth.

Larry Yeah, There was a falling out, That's for sure, but then he lost out, too.

Priscilla He was out within a year or so.

Mary Yep.

Larry So that was the end of your relationship with John, because of him?

Mary It was a lot of things, but no, John invited us back and the man who was working with John at the time told me not to mention Kenneth's name. But I'm loyal to Kenneth and so John didn't work with us.

Priscilla Can you tell me what memories you have of John when he came out here? Dean had said he came out here three different times. Do you remember any of the things that happened when he did?

Mary Well, he went and spent time in the pyramid.

Priscilla Did he?

Mary Yeah.

Priscilla He meditated.

Dean When he'd go in the pyramid, we'd leave him in there by himself.

Larry Okay, for several hours?

Dean Yeah.

Mary Who knows? I can't remember. Yeah, basically you have to realize that probably the 33 degree Masons are connected with the Templars, and I have been working with the Templars basically, this is what? The Templars came to me in 1996, and what Tony Blair did was created the Millennium Dome, and then they wanted to cap the great pyramid on December 31, 1999. Of course, we had the whole thing with the computer shut down.

What was really going to happen was they were going to cap the great pyramid and send energy through the Earth's grid, using ELF and this antenna system to the Millennium Dome, which would have created Y2K in a big time. It would have put a surge of energy through the Earth. That's what Y2K was really all about. And the Templars came to me in 1996, when I was in France, and said, "You've been trained as a Mary and you know about the antenna system that can

heal this project.” So yes, I don’t know how much John has been involved in this, but this has been a Templar situation for a long time.

Larry Well Mary, do you know about the suggested relationship between Joseph of Arimathea and the Templars?

Mary No, I don’t.

Larry Well, one theory is this is the man that gave Jesus the tomb to use, a very rich man.

Mary Yeah, I know who Joseph of—

Larry You know who he is, and that he took the two Mary’s and sailed away with his fortune—30 ships of gold and—

Mary Mary was a title. There were more than two Mary’s.

Larry Well, however many.

Mary I mean, it’s like saying Mary was a title that means doctor or healer.

Larry Okay.

Mary Mary Magdalene, Mary Jacoby was James’ mother. Mary Salome was—so Mary was a title, and if you go to France even today, the gypsies honor the Mary’s, the group of Mary’s coming in to St. Mary’s de la Mer.

Larry Okay. Well anyway, he went away to parts unknown, some people think in England, and the Templars guard that secret. That’s one theory. Now John believed that he had been Joseph in a previous life.

Mary Could have been.

Larry Did he ever talk to you about his reincarnations?

Mary I don’t know. As I said, my contact with John was very, very low. I mean, there wasn’t all that much.

Larry Dean had more contact than you did?

Mary I think so, yeah. The situation was since 1996 the Templars, I’ve been working with the Templars. I’ve been sent all over the world to work with the Templars, and I sell Young Living Oils. I know this isn’t an interview about me, but I will say that in 2006 see, I sell Young Living Oils and they take people on trips. They call them the Diamond trips. And I wasn’t ever anywhere near becoming a

Diamond but on December 2006, I became a Diamond like wacko. I mean, it was an impossible situation, and that gave me a trip to Rome. I earned a trip to Rome because the Diamonds were going to Rome. And they called me up and said, Well, since you made a Diamond, and I made a Diamond two other months after that.

Larry Is this by selling so much?

Dean Yeah.

Mary So selling it—it isn't selling so much. It's selling it as getting six legs, six silver legs; the way it's organized, I had probably sold three legs, and I'd have four legs and I had three legs. In 2007 or 2006 December I had seven legs. I've never had seven legs again, but I had seven silver legs which made me a Diamond—and I had no idea. So in May, I went to Rome, and I knew I couldn't back out because of the very way that it was done. So when I went to the Vatican, you know about the sword and the cup? Have you ever heard of that? Did you ever read or hear the Da Vinci code?

Larry Yeah.

Mary Oh. Tom Hanks said this is the sword and this is the cup and that is how energy is moved across. You create a vortex of attuned antenna over the sword thinking that the sword is a high pressure—look at weather patterns—and the cup is a low pressure. A high pressure dumps into the low pressure and the low pressure goes up into the high pressure. It's the same way with moving the grid energy and that's why you call it the sword and the cup. In the middle of the Vatican you have an obelisk in St. Peters Square. You look at the resonating chamber of the church. It is a cup. Can you see that?

Larry Like a crucible?

Mary The chamber inside.

Larry Oh, I see.

Mary The chamber inside is a cup. And the Templars designed all of this that way, and working with the Templars you begin to understand it. So when you are given Last Rites—are you Catholic?

Larry No.

Mary You seal the soul into the body and the soul is sent to the Vatican, and that is what purgatory was about.

Larry Did you know that? She was raised Catholic?

Mary Did you know that's when they seal the soul in the body, the Last Rites, and they sent you to purgatory? John Paul wanted to release the people out of purgatory. He was a Templar and probably worked with the Templars. Brother John was the one—so I was sent to Rome to be the eyes to release the people out of purgatory. So I sat there with my back to the obelisk looking at the church, created the Holy Grail vortex, and then I created the Holy Grail vortex over.

And then I started to read the Catholic creed which is in that article ,and I started to slink the energy from the obelisk over (just like a slinky toy) over to the church, putting the Church of Love into the Catholic church. See, there was a group of people called the Cathars which actually had Jesus writings, and the Catholic church murdered them because they wanted to destroy Jesus' writings; the Cathars called it the Book of Love.

So anyway, I was putting a brief statement of the Book of Love into the church and out pop seven lead caskets right out, and then out of the seventh lead casket popped John Paul. And what they did is, they dressed him in gold and carried him around, but they sealed him in gold before he died so his soul couldn't leave. And the whole courtyard filled up with Templars with their swords in the air; and at that point in time, when John came out of the lead casket, purgatory was drained.

Larry So you were successful then.

Mary Honey, it's a planet of free will. John Paul was allowed to take all of the people out of purgatory that wanted to go. You cannot force anybody to go. The first law of the creator is, My perfect love for you, my creation, is your perfect freedom. It's a free will planet. So yeah, but they were given the opportunity to leave.

Priscilla Now, are the Templars a Catholic based thing or is that part of the Masons' Templar, or are they a complete separate entity?

Mary Originally in the 1100's or 1000's, 1099 the Templars were formed. Nine priests went to Jerusalem to find the Ark of the Covenant; they dug under Solomon's temple to find the cache of gold. And when they found the Book of Love, the true teachings of Jesus, they went to the Pope and said, We'll expose you. So there was a Papal Bull, which means a papal law, that the Templars would be left alone. At that point in time, they created sovereignty on the planet.

You have to realize at that time there was a feudal situation. So they went about with their monies that they received from under the Temple Mount. They started building these huge resonating chambers to free humanity, and to create a temple on the planet so mankind could return to the Father. That's what the Templars were about, and the 33 degree Mason law is the same law as the Templars.

Priscilla I see, okay.

Larry Now Mary, I'd like to get this understood in my mind. When John came out here to meditate in your pyramid, did he believe that the power that was coming there was like connected to an astral plane?

Mary I can't answer that. I can't tell you what was in his mind. He's been trained in the same knowledge that I've been trained in. To be a 33 degree Mason, I don't know, but I assume what I'm telling you are 33 degree Mason secrets.

Larry It's hard to get—they won't talk about it. Nobody will.

Mary No, and I talk about it and I'm not. It is now time to give this to the whole planet, because we are at such a state that it has to be. But I would assume what I'm telling you is exactly what a 33 degree Mason knows.

Larry Do you think that there's a connection with an astral plane?

Mary Sure.

Dean Oh, sure.

Larry You do, then.

Mary Yeah, but the astral plane is not a high plane.

Larry Isn't it where the White Brotherhood exists?

Mary I don't know where the White Brotherhood [exist]. I mean, if you listen to everybody and their brother, everybody's got the planes all interpreted differently.

Larry Right, right okay.

Mary Some people say fifth dimension. Some people say third dimension. It is by your own frequency that you can reach a higher plane. The statement that I go by is the I am, and this is what Kenneth told me, and I'm sure this is probably Templar law. Who am I, what am I? As I am I am not, but as we are, I am. So, if you are a person of service, what you have done is you are in the I Am creation. And this was the same thing that Moses received on the mount, and for you, my creation, my perfect love is your perfect freedom.

We have been given total free will, and any time that you violate somebody's free will you are creating a sin. So that is the way it is, and I will be with you for forever and ever and ever, until you graduate, and forever more. Alice Bailey,

everybody's got their own interpretation of the different planes of consciousness. It isn't something that I care to look into. I really don't care. To me that statement is enough to know that if I'm a person of service, and I can get rid of my own anger, get rid of my own jealousy, raise my frequency to a point where I can graduate, that's what I have to do.

It doesn't matter about if I get involved with—people have attempted to control different planes of consciousness and it comes down on them. But my work with the Templars is basically I know in a past life I was trained as a Mary. And when I met the Templars in 1996, they asked me that this horrible thing called Y2K was going to happen, and they wanted me to be their eyes. So I went all over Europe and recoated the churches. That was part of my mission because, they were bombed down in the first and second world wars. And the Rockefeller Foundation went in there and recoated them. And there's supposed to be resonating chambers, so mankind can graduate.

Larry See, John had a mission. He felt he was to create the Institute; he felt that he had tried repeatedly throughout history, had come back often with the same people, and not been successful, and this was his last attempt.

Mary And what he tried to do with the building of the Institute was to do exactly what the Templars did: To create a temple so that man could graduate out of it.

Larry Do you think that's what he intended the building to be? Have you been out there?

Mary No, I've been out there but I've never been allowed in it.

Larry Really? Oh, I think they'd let you in there.

Priscilla It's open to the public.

Mary One time I went out there. I went and talked with the librarian. I don't know how many years ago I went, and I showed him my book. He said John often came down here and read this book, and that was my first book which was [Pyramid Energy Explained].

Larry Is that this one here?

Mary Well, that's a combination of three books. I gave John my first book, which was Pyramid Energy Explained. He said that John had 11 copies of it, and he often came down and read it.

Larry When did you write that first one?

Mary Wrote the first one in 1979. Well, let's see, 1978.

Priscilla And what was your second book called?

Mary The second book was Pyramid Energy. By that time after the 80's, we really didn't have much contact with John. The second book was called Pyramid Energy and Second Coming. They're all three in that book.

Priscilla Good.

Mary And then the third book was Pyramid Energy, the Philosophy of God, the Science-of Man.

Larry You know, after Ken Killick left, John came under the sway of another psychic, Jim Gordon. Have you ever heard of him?

Mary Yeah.

Larry For the rest of his life he was very loyal to Jim Gordon. They actually moved out to Hawaii for the last months of his life, and they lived next to each other out there.

Mary Oh, Jim was a good person.

Priscilla Oh, you've met Jim Gordon then?

Mary I've met him briefly. We've had contact with him. Jim Gordon was part of the Coptics, I think, at one time, wasn't he?

Larry And he was part of John-Roger's group. You know about him?

Mary You have to understand, at that point in time, Dean and I were pretty poor and we didn't do much. We were flat broke.

Dean Flat broke. As a matter of fact, somebody suggested that we get a non-profit stamp, you know? Said, we already know we're non-profit. We don't need a stamp to tell us that.

Mary Now we were pretty poor, so we didn't hang—I mean after 1980, when I quit teaching school, I was sick and I went to study homeopathy; and Dean was working for Carl Goodwin, and they went out of business and his back was bad. So we were living on nothing.

Larry Where did you teach, Mary?

Mary Taught at Martin for 18 years.

Larry Oh, did you really? What did you teach?

Mary Girl's Phys Ed.

Larry Oh, no kidding.

Dean Also you filled in a lot of classes.

Mary Yeah, I also taught English and a few other things but—

Larry So when you taught Phys Ed, were you into mind, body, spirit? Sounds like your dad was.

Mary Dean and I weren't into this much until 1968. Then we got picked up.

Larry With the experience, yeah.

Mary Well, you see, my father—you knew my father worked for the Chicago mob. Did you know that?

Larry No.

Mary Yeah, that's where his money came from.

Larry Is that right? I guess through being a doctor he made his money.

Mary You know how his doctoring was? A family would come in with ten children and he would charge him a dollar a shot.

Larry My family was one of those that got that treatment, because there were seven of us and I was the oldest.

Priscilla And they were poor, very, very poor.

Mary You see, and that's the way my dad—

Larry I know your dad. That's why he was so beloved in part.

Mary But you see Joe Grabner—I can tell you a story. When I was about five years old, during the Second World War, my mom would come out here, we'd come out in the car with my dad; we'd come out to Joe Grabner's.

Dean Up there, when Alice had that white fence along the road, next to the road.

Larry Oh, okay.

Mary Anyway, my mother would sit in the car because we had food rationed. We couldn't get sugar. You couldn't get stuff. Well, Joe would always come out with two grocery bags full of food that you couldn't get. And I probably was five or six years old, and there was a kitten in the yard, so I jumped out of the car to chase the kitten. And my dad came out shaking and two men in suits came out, and he came out and told me, "Mary, never get out of the car while you're here."

I don't know what was going on. I don't know if they had a criminal in there or what was going on. I had no idea. But when I was in high school, I said to my dad, "I've been watching this for years. Every time we go someplace the mob meets us. We have free tickets, we're given this, we're given that. What the hell do you do for the mob?" And he said, "Mary, they're men of honor. They treat you with respect. Your government's people are the crooks."

Larry Like Hoover and that kind of—

Mary Yeah, he said they're the crooks. I to my father, "Well what do you do?" He said, "I never charge them. What's interesting is they all come in. I will treat them. I never charge them. When they leave there will be \$1,000 or \$800 laying on my desk."

Larry So it was medical treatment he was supplying. Well, you know, he would almost have to with his oath. mean, if you get somebody who's sick, it doesn't matter who they are.

Dean That's right.

Mary That's just what he said. He said, "These men are men of honor and they—" I imagine that he had removed a few bullets when they brought them up here, and I was just a child. I don't think I could have been more. It was during the war. I was born in '38 or was I born in '37? I don't know. Anyway, I got out to chase the kitty because, you know, you sit in the car for a half hour. And my mother would come out, and I was young, so I probably had to come with my mother because she would collect her groceries.

Larry Was this guy wealthy, this Joe?

Mary Joe Grabner was head of the Chicago mob.

Larry Oh, I didn't know that he lived here.

Mary He had a summer home up here.

Dean They used to call Pullman down there, the little Chicago.

Mary He was second in command of the Chicago mob.

Larry No kidding.

Dean When Al Capone was done in.

Mary Yeah, so Joe Grabner had a summer home here and he had movie stars out here. He had the whole works. And no matter where we went—I can remember when I was in high school, Joe Grabner stopped by in his Cadillac and he said, “You Dr. Mahan’s daughter?” Brought me in a bunch of cookies. He said, “Joe’s here. He’s looking for him. Can you get a hold of him right now?” But Joe demanded that kind of treatment.

Larry Was he Italian?

Mary Yeah.

Larry Had to be.

Dean I was really impressed, because when we went on our honeymoon out to Las Vegas, Joe Grabner said, “Now if you’re not satisfied with your service, just mention his name.” So we sat way back in the corner and the people on the stage are going to dance. We got up started walking out; so we are walking out and the maître d’ said, “Aren’t you going to stay for the show?”

At that time most of the shows were free out there, and we were walking out. We said, “Well, Joe Grabner said we’d have better seats.” And he said, “He did? Well, follow me,” and he seats right down; and right in the front of the stage was Xavier Cugat and Avrilene and all those people; they just treated us just like some of the old gang, you know?

Larry Just mention Joe’s name.

Mary Well, I will say that growing up, when we traveled anywhere, the mob knew where Dad was, and he would get a telephone call and he would leave. I imagine it didn’t matter if we were in California or if we were in New York, if the mob needed assistance.

Larry That’s interesting. That never got written up by Joe Armstrong or anybody did it?

Priscilla No, and it shouldn’t.

Larry No, I know, but it’s just fascinating to know.

Mary And that's where his money came from. It had to come from there because, as a doctor, he never charged anybody anything.

Larry I know he didn't, yeah. Probably if you had it he'd charge you, but—

Mary Oh, yeah. That's what he said to me. He said, "If a man is wealthy and he wants me to take my lunch hour and go up and give him a shot, I charge him double. I charge him double and triple because they've got it." But I would suggest that what I told you about the Templar knowledge is exactly—and the 33 degree Masons stuck together.

Larry I wish there was some way we could interview one that would tell us the secrets, but I doubt it. There was another one in Kalamazoo that knew John, and he wrote just a brief little letter saying that, yeah, I was one and John was and that's all.

Dean You know, what got my mother back at home down there in Indiana—my mother could pick all their books up and read them, all those quarterly books, and she'd read them just like—

Larry Oh, she knew the code?

Dean Well, I mean she evidently—that's another past life thing.

Larry Oh, I see.

Dean But she picked those code books up and read them just like it was—

Larry I had an antiquarian bookshop in Kalamazoo back in the 70's, and occasionally we'd get an estate where there would be one of those books, those secret books. And you know the Repays in Allegan?

Mary No.

Larry Well anyway, he was a Mason and he'd come, and he'd just be madder than the devil if we had one of those, because you're not supposed to have it. And he'd buy it and take and save it.

Mary Well, actually what my father told me is because we had the pyramid, he wanted to make Dean a 32nd degree Mason. And Kenneth said that with what we know from just working with the pyramid antenna, that we could teach *them* what they don't know.

Larry Was your dad a Mason?

Mary My dad was a 32nd degree—he was a Shriner.

Larry Oh, okay.

Mary He wasn't a 33rd, he was a Shriner.

Larry Okay.

Mary He went through and he wanted—because when we started to build the pyramid, he offered Dean, he said, “I would like to put you through the Shriner.” And when we talked to Kenneth about it, he said, “With what you know about the grid and what their secret knowledge is, you could teach *them*.”

Dean Well, I'll tell you, my father was a Mason. I'd sit with my mother at night while he'd go off to these different lodges, wouldn't get home, one, two, three o'clock in the morning, you know? I sat there with her all the time.

Larry She was worried about him?

Dean Yeah, and I said—

Mary Well, she was left home, home alone.

Dean Yeah, and I said I'd never do that to anybody.

Mary No, I imagine with what we have been given to do with this planet, we probably know more than most of the Masons about the Templar knowledge—because you have to remember since 1969 when they came to me, I have been their eyes and ears and I have been sent all over the world to create—

Dean —So I sit home alone.

Larry Now *you're* home alone.

Mary Yeah, and—

Dean I went with her a few times, but—

Larry How did they contact you, Mary?

Mary How did they contact us? Well, we had the initial thing. They contacted us in green time. And what happened to me in 1990 and I'm going to take—I got sued for practicing medicine because I'm a homeopath.

Larry Oh, really? Did the local authorities here sue you?

Mary No, a lady—a chiropractor in Detroit asked me—I'm a Radionics operator too. A local—Dr. Kent. I went to a Radionics class and Steve Weston was sick; so I

taught homeopathy, and he called me up and said, “My family has been using homeopathy. Can you explain to me why my 27-year-old client is dying of cancer?” And I’m a Radionics operator. That’s a little black box where you stick a picture in and you can read them, dowse out what’s the matter with them.

Larry A picture of the patient.

Mary Yeah, and I said, “Well, she’s got nickel poisoning and you can’t antidote it.” I said, “What does she have in her mouth?” Well, she had nine nickel crowns. Sent her to a dentist who followed the meridians and everywhere, she had one of those nickel chrome crowns on, and she had cancer in that meridian. So I recommended that she have those teeth pulled immediately. But the dentist said, “No, we’re going to change the fillings.” She had gone to the University of Michigan. She didn’t have any time left to live and she lived nine months. And when she died they sued me, the chiropractor, and the dentist.

Larry Even though you told what was wrong with her.

Mary Doesn’t matter, honey. If you don’t have a license to hunt and you go hunting, you’re in violation. If you don’t have a license to diagnose and you diagnose, you’re in violation.

Dean The doctor’s name is Misdiagnose.

Mary For me to tell her that her nickel chrome crown teeth were killing her—

Larry Even though that’s what it was.

Mary It doesn’t matter.

Larry Now with homeopathy you would give a person a—

Mary Like cures like. It’s alchemy. You give the same vibration to get rid of the same vibration.

Larry Is it a drug that you give?

Mary No, it’s a vibration. A homeopathic remedy is reduced until there’s nothing chemical in it. It’s a frequency, and it would cancel out the frequency within the body.

Larry But normally this would give a patient a symptom similar to what they’re experiencing?

Mary If it was nickel poisoning and you could cancel out the frequency. But if you have something nickel in your body you can’t cancel it out. You can’t go against

that, so you needed to get rid of the nickel. It's that simple. I said, "We'll antidote it, we'll have the teeth pulled and we'll antidote it." And the dentist said, "No that's too much of a shock on the system." So he dinked around and changed the crowns and charged them lots of money, and when she died nine months later, the family sued all of us.

Dean Went on for four years.

Mary Yeah, so I think what I told you about—

Larry Very helpful.

Marry About the Templar knowledge, I don't know how much you want to put in that.

Larry Well, you see, I'm not writing anything. I'm just collecting information at this point, and we suspected that there was more to John's 33rd degree than anybody knows. If you go out there in the center, there's a lot of Masonic signs in there.

Mary The Templars simply created an atmosphere to create a temple on the planet. I imagine John Fetzer's Foundation is a temple, is created as a temple. Even Moses carried around a tent. So if you're going to prepare a person to transcend time, space, energy, and matter you put them in a temple; you don't take them out in the middle of the street and let them float up. And this is the job the Templars had—to create the planet as a temple. And you see, basically when what my job has been was to go out all over the world.

And I knew that when I became, in 2006, I became a Diamond, that even if I didn't want to, because I sold \$300,000 worth of product for Young Living and these Diamonds sold a million, million and a half. So I don't feel that I rated with them; but I knew that for some reason the Templars wanted me to go to Rome, and why I needed to go to Rome. And I was told to go to St. Peters Square, create the Holy Grail vortex on a sword, attuned vortex generator antenna system, slink that energy over to the cup in the sanctuary of the church; and [I was to] read the Catholic creed which was Jesus' summary of the Book of Love, and put the Book of Love back into the Catholic church. That's what I thought my mission was.

Larry Does it exist still, the Book of Love?

Mary No, the Book of Love was destroyed when they destroyed the Cathars. The Cathars had Jesus' writings. They were French farmers; and if you go there, they murdered them for 50 years. They destroyed town after town, castle after castle of the Cathars only to get rid of the Book of Love. So I put the Book of Love back into the Catholic church. figured that's what my mission was. And out popped all these Templars, the whole courtyard filled up with Templars; I couldn't make this story up; and then out popped seven lead caskets. Then John

was popped out, and carried around on that gold thing, all gold, and then he just "proofed." When he went, I suppose why they didn't want him to go was because he was going to drain purgatory. He was going to allow the people in purgatory to go back to My Perfect Love is your Perfect Freedom to make a choice. And that's why they encased him in gold and buried him in seven lead caskets.

Larry Now does the Archangel Michael and the age of Aquarius have anything to do with this?

Mary Well, sure. I have not really studied but when Dean and I went to Montserrat—now you see the Pyrenees are shaped like pyramids. The Templars took the Ark of the Covenant up, and they made the Pyrenees mountains all into pyramids; there's a church called Montserrat in Barcelona, and there's a round chapel and Lord Michael sits there.

Dean There's a statue there.

Mary Statue there, and we went in there, and he jumped off his plinth and came down and knighted all of us for the work that we did. And that's where the Templars today in Spain are knighted in that chapel. That was an experience.

Priscilla Unforgettable.

Larry Yeah, I guess so.

Mary He jumped off his plinth—

Dean I felt that—that soldier, him and I—just like it was real.

Larry We really appreciate you taking this time.
